

The Einstein Theory of Relativity

Professor Lorentz is credited by Einstein with sharing the development of his theory. He is doubtless better able than any other man - except the author himself - to explain this scientific discovery.

Formulated by Albert Einstein in 1905, the theory of relativity is the notion that the laws of physics are the same everywhere. The theory The Einstein field equations comprise the set of 10 equations in Albert Einstein's general theory of relativity that describe the fundamental interaction of The theory of special relativity explains how space and time are linked for objects that are moving at a consistent speed in a straight line. One of It is known as special relativity because it applies only to special cases: frames of reference in constant, unchanging motion. In 1915, Einstein published the general theory of relativity, which applies to frames that are accelerating with regard to each other. Time does not pass at the same rate for everyone. General relativity is a theory of gravitation that was developed by Albert Einstein between 19. This was the theory of special relativity.
