

Flower Children--The Little Cousins of the Field and Garden

This is a digital production of a title first published by P.F. Volland & Company in 1910. This charming collection of flower poems and full-color illustrations (now digitized) animates the 82 flowers included in the book. From Crocus to Holly, the flowers are ordered in the book as each would appear throughout the year in a garden. Each illustration is half child and half flower, creating a wonderful way for children to see themselves in the natural world.
