

# Tallest Stories

If every tale told in a tavern is a tall story, then what happens when the entire universe becomes a tavern? It means that every story ever told is tall and therefore untrue, and this includes the true tales. They are all lies. But a lie is a concept only possible because it can be contrasted with truth: without its opposite concept it makes no sense at all. This implies one of two unlikely things, (a) the universe is not really a tavern, (b) there are other universes beyond this one where true stories exist. If you ever learn which is the correct answer to this riddle please let me know. 60 linked stories, 60 illustrations, 18 years in the making - this is probably Rhys Hughes most important book to date.

When you tell a tall fishing tale, you're following a time-honored tradition. Here are five recent outlandish fishing tales. We advise you to take them with a grain of salt.

The city of Shanghai, China is one of the fastest growing cities in the world in terms of skyscraper construction, with the City of Shanghai reporting at the end of 2004 that there had been 6,704 buildings of 11 stories or more completed since 1990. In 2011 there are over 20,000 buildings 11 stories or higher and more than New York City, the most populous city in the United States, is home to over 6,486 completed skyscrapers. The 104-story skyscraper also stands as the tallest building in the United States, the tallest building in the Western Hemisphere, and the sixth-tallest tallest building in the world.

Tallest Stories has 6 ratings and 1 review. Seregil of Rhiminee said: Originally published at Tales of the Tallest, Tallest Stories is one of the best and most interesting books I have read.
