

# Stellar Chinese Character Recognition Review: Flashcards for Articles of Clothing (Stellar Chinese Character Flashcards Book 2)

Are you tired of not being able to recognize Chinese characters? From my seven years of practical teaching experience, I've learned that practice and application of what is studied is CRITICAL to success! That's why I've started a type of flashcard review system that not only teaches you how to learn Chinese with Chinese characters, PinYin, and English, but also FINALLY allows you the chance to practice what you've learned so that it's not easily forgotten!! Chinese writing is complex, but thankfully, the world of technology has made it only necessary that we recognize characters for reading! No longer do we have the need to write a Chinese character, we can simply type in the PinYin on our keypad and the Mandarin Chinese characters appear! But, selecting the right character from the list will be determined by how well you can recognize a character from a set of other characters! Therefore, it is imperative that we learn to recognize Chinese characters if we have any hope of communicating in or reading Chinese! What better way to learn the characters than to use flash cards?!?!?! You can learn the Chinese language with flash cards that run on your Kindle just like any Chinese app! The best part is that before each session of rapid recognition, you have the chance to review each of the characters (with their PinYin and meaning) in a concise list that's easily accessible prior to each rapid review. Each rapid review displays characters in a numbered format so that you can easily check your progress at the end of each session! As one would expect, the first session teaches you each of the characters while giving you the English and PinYin sound, with successive sessions allowing you to practice your skills! (Answers, of course, are given at the end of each rapid review session for your convenience). With Kindle Chinese flashcards, there's no need for other types of online flashcards!

Finally, you can learn about Chinese letters, Chinese words, or Chinese symbols and meanings (no matter what you call them)!
