

Cold Hit

Renowned sex-crimes prosecutor and bestselling author Linda Fairstein sends her acclaimed heroine -- the stylish and steely-nerved D.A. Alexandra Cooper -- on a hunt for a killer inside New York City's glitzy art world. Alexandra Cooper has seen many murder victims, but few more disturbing than the silk-clad body of a woman, her hands and feet tied to a ladder, pulled from the turbulent waters at Manhattan's northern tip. With her colleagues, including NYPD detectives Mike Chapman and Mercer Wallace, Alex races against the clock and hopes for a cold hit -- a DNA match that would reveal the identity of the murderer by linking the crime to someone already in the police database. But as the case pulls her into the exclusive world of East Side auction houses and cutting-edge Chelsea galleries, Alex discovers she may be marked as an expendable commodity in a chilling and deadly scheme....

A DNA cold hit refers to an instance where one or more connections are made between a perpetrator and a crime scene in the absence of a current investigative lead. Crime laboratories receive notification of these cold hits and after a confirmation process the investigator is notified. J Forensic Sci. 2009 Jan 54(1):22-7. doi: 10.1111/j.1556-4029.2008.00917.x. Epub 2008 Nov 21. Average probability that a cold hit in a DNA database search In cop-show parlance, this was a cold hit--a computer match between crime-scene DNA evidence and a suspect registered in a databank. In the Scoville case, This decision is not the only discussion on the subject of relevant statistics for assessing the significance of a DNA match in cold-hit cases (see, e.g., Felch and
